

IN THE CLAIMS

1.-22. (canceled)

23. (new) A product suitable for delivering a pharmaceutical aerosol formulation comprising,

(a) an aerosol canister comprising a container closed with a metering valve, said container further comprising a pharmaceutical aerosol formulation substantially free of surfactant comprising, a bronchodilator selected from the group consisting of ephedrine, adrenaline, fenoterol, formoterol, isoprenaline, metaproterenol, phenylephrine, phenylpropanolamine, pirbuterol, reprocoterol, rimiterol, salbutamol, salmeterol, terbutaline, isoetharine, tolubuterol and orciprenaline or a salt thereof, a fluorocarbon propellant, and 6% to 25% of a polar co-solvent, and

(b) an actuator with a spray orifice aperture of from about 100 to about 300 microns,

wherein said canister fits into the actuator.

24. (new) The product of claim 23, wherein the bronchodilator is substantially insoluble in the co-solvent.

25. (new) The product of claim 23, wherein the bronchodilator is in the form of a salt.

26. (new) The product of claim 24, wherein the bronchodilator is in the form of a salt.

27. (new) The product of claim 23, wherein the bronchodilator is a salt of salbutamol.

28. (new) The product of claim 23, wherein the bronchodilator is a salt of formoterol.

29. (new) The product of claim 23, wherein the canister is actuated by a breath operated device.

30. (new) The product of claim 23, wherein the propellant is 1,1,1,2-tetrafluoroethane or 1,1,1,2,3,3,3-heptafluor-n-propane.
